

# Rock-Solid or Panta Rhei? the Emerging Governance of the Energy Union

## ANNUAL CONFERENCE OF THE EUROPEAN ENERGY POLICY CHAIR OF THE COLLEGE OF EUROPE, 3 MARCH 2017, BRUGES CAMPUS

As the Energy Union starts delivering, its governance takes shape. The Energy Union governance goes beyond the Regulation by the Commission as part of the Clean Energy for All Europeans Package and should not be limited to the achievement of the sustainability targets only. Rather than a specific instrument, its governance will define the essence of the Energy Union and its design will decide upon the Union's success and continuance. Reviewing the emerging principles and procedures, giving the floor to the institutions and key actors will allow for first preliminary conclusions as to what distinguishes the Energy Union from an internal market re-run, and where adaptations are required to ensure it adds genuine value.

### 9:00 - 9:30 / Welcome Address

**Dirk BUSCHLE**, European Energy Chair of the College of Europe  
**Jörg MONAR**, Rector of the College of Europe
