COMPETITION
COOPERATION
EU - ASIA Partnership

PRESS RELEASE 26 July 2019

New contribution to Competition Policy Cooperation between the EU and Asia

The College of Europe [Development Office](#), organized, in cooperation with Development Solutions Europe Ltd., as in 2018, three tailor-made summer schools on EU Competition law.

Each **Competition Summer School (CSS)** lasted two weeks and was designed to meet the training needs of three very different target groups of participants: Indian and Korean competition officials; ASEAN Member States and ASEAN Secretariat competition officials; Chinese officials from the State Administration for Market Regulation.

Each programme included a total of 53.5 hours of face-to-face course (i.e. 160.5 hours of training in total) and a one-day study visit at [DG Competition, European Commission](#). The CSS programmes followed a core common structure so as to offer to the three groups the opportunity to:

- **Enhance awareness and understanding of EU competition law and procedures**, including with respect to State-owned enterprises and State aid control, among other topics;
- Deepen the knowledge on EU competition law and **enable the establishment of new initiatives towards convergence in competition policy** and enforcement between the EU and the participants' respective jurisdictions;
- **Enhance interactions** with representatives of the EU working on competition matters.

This activity was funded by the European Union and is part of the EU-Asia Competition Policy Cooperation project: <https://competitioncooperation.eu/>.
