COURSE OBJECTIVE

This course provides non-economists with a comprehensive and introductory overview of economics. The focus of the course is on economic principles. The course will examine both microeconomics (the study of individual decision making by consumers and businesses) and macroeconomics (the study of social level problems that most often are reported in the evening news, e.g. economic growth, inflation, unemployment, government spending and taxes, money and interest rates and international exchange and trade).

COURSE LEARNING OUTCOMES

Students are able to:

- Understand the basic theoretical concepts of economics.
- Apply their knowledge and understand daily policy-making issues in economics.
- Actively take part in and assess debates on economic affairs.
- Understand economic topics in newspapers and headlines.
- Tackle in an autonomous way questions of economic significance and interpret economic data.

RECOMMENDED PREPARATION

None

TEACHING METHOD(S)

Lecture (E-learning platform; PowerPoint presentation).

ASSESSMENT METHOD AND CRITERIA

Not applicable

COURSE CONTENTS

- 1. Introduction**
 - a. What economics is all about?
 - b. Strategic interactions – Game theory and its applications, Pareto Efficiency
 - c. Strategic interactions: Simultaneous-move games – Duopoly , Prisoner's Dilemma, Coase theorem
 - d. Strategic interactions: Auctions
- 2. Market Interactions**
 - a. Demand
 - b. Supply
 - c. Equilibrium
- 3. How markets work?**
 - a. Taxes
 - b. Marginal Cost and Marginal Benefit
 - c. Elasticity
 - d. Externalities and market failures
- 4. Inflation, Unemployment and Money**
 - a. Inflation – introduction
 - b. Inflation – History and Costs
 - c. Unemployment
 - d. Inflation and Unemployment
 - e. Money Supply
- 5. Gross Domestic Product**
 - a. Key terms & introduction
 - b. Expenditure and Income approach,
 - c. Nominal versus Real GDP and limitations of GDP
 - d. GDP – Aggregate Demand and Aggregate Supply
