NASSEF Youssef

### ACADEMIC ASSISTANT(S)

KOLASINSKI Tadeusz

### COURSE TYPE

Specialist Course

### MAJOR(S)

EUW

### ECTS CREDITS

4

### TEACHING HOURS

20

### INDIVIDUAL & GROUP STUDY TIME

80

### TUTORIAL(S)

### COEFFICIENT

1

### LANGUAGE(S)

EN

### COURSE OBJECTIVE

The course will uncover the international politics of climate change through a multidisciplinary lens. It provides a grounding in understanding the causes and effects of anthropogenic greenhouse gas emissions on the climate and biosphere, appreciating the complexity of the multilateral setting that underlies international policymaking, and finally discerning the factors affecting the future evolution of this discourse.

### COURSE LEARNING OUTCOMES

Knowledge and understanding of the politics of climate change, and of the scientific, socioeconomic and political factors underlying climate policy. Ability for critical analysis of the different outlooks towards the climate change discourse and the challenges associated with its multidisciplinary as well as its uncertainties.

### RECOMMENDED PREPARATION

Familiarization with the readings and following news articles on country positions on climate change.

### TEACHING METHOD(S)

In-class presentations and interactive discussions.

### ASSESSMENT METHOD AND CRITERIA

- Policy paper of 1500 words (40%) - topics will be communicated during the first lecture
- Final exam (60%): in-class, written, closed-book, 2-hour exam; students will need to answer two out of eight questions.

The College of Europe reserves the right to change the delivery and assessment of the course in case of circumstances beyond the reasonable control of the College (force majeure). Any communication from the campus administration in this regard takes precedence over the information provided in this ECTS card.

Retake examinations, i.e. exams passed in the second examination session, will have the same format as those taken during the first exam session. The only exception concerns oral exams, which are replaced in the second exam session by written exams. When a student takes an examination during the second session, the final mark for the course is based solely on the result of the retake examination. No other element of evaluation which would have been taken into consideration in the calculation of the final mark during the first examination session will be considered in the second session.

## COURSE CONTENTS

### **Module 1 (5 hours)**

#### **Climate Change Basics:**

Introduction to Climate Change Science

- Political and socioeconomic dimensions
- International, regional, national and subnational dimensions
- Inertia, momentum and cognitive bias in the climate change negotiations
